March 5, 2019

Dear KIS Community,

Thank you for your kind understanding of our need to close school today in order to thoroughly inspect our current ventilation systems and install additional air purifiers on campus. Additional air purifiers have been installed in each classroom. Existing air filters have been cleaned, and the installation of new filters in our existing school-wide ventilation system will be continuing overnight throughout the next week.

Principals and school staff have been monitoring our internal air quality management systems throughout the day, and we are pleased to announce that we will be able to resume the regular "B" day school schedule tomorrow Wednesday, March 6.

It has been extremely unsettling to see the seriousness of recent air quality reports. In addition to the immediate steps described above, we are developing longer-term strategic plans to closely monitor conditions and update facilities to deal with the increasing frequency of air quality concerns.

We will continue to make best efforts to ensure a healthy learning environment for our students, and we look forward to seeing faculty and students back on campus tomorrow.

Thank you,

A handwritten signature in blue ink that reads 'Michelle Quirin'.
